

implications on project development for the 2010 MTP. The chapter entitled *Transportation System Operation & Management* explains the level of service currently in the region, and the forecasted level of service in 2035 given 2010 MTP project improvements. Further statistics, that include other modes of travel as well, are listed in the *System Monitoring & Benchmarking* chapter.

Table 5, listed on the following page, includes a detailed description of the current roadways in the region, and their relative levels of congestion.

Travel Flow on Highway 101 during an off-peak period.
